

THE PRACTICAL COOKING (electric 400 V)

Special HOOD for vertical electric rotisseries

With active coal filters

- Hood for exhaust of greasy smoke for vertical electric rotisseries only.
- 100% Stainless Steel body.
- Filters in galvanized frame.
- Grease tray.
- 230 Volts 50Hz Electric power supply.
- Filters removable from the front side of the hood and hidden by a removable decorative panel.
- Economical : no exhaust chimney.
- Hood hidden behind an enamelled decorative panel matching with the rotisserie colour : With stainless steel or brass trim.

To avoid condensation and over heating of the room, provide mechanical ventilation

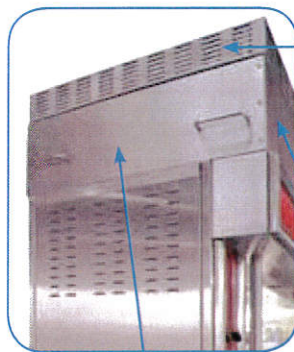

The filtration system has an easy front access and hidden by a front decorative panel.

This hood does not need a chimney to evacuate the smoke, you have the possibility to install your rotisserie inside your shop.
